Chapter 1 Longitudinal Data Analysis 1.1 Introduction One of the most common medical research designs is a 'pre-post' study in which a single baseline health status measurement is obtained, an intervention is administered, and a single follow-up measurement is collected. In this experimental design the change in the outcome measurement can be as-

### Chapter 1 Longitudinal Data Analysis

The survey is a popular means of gauging people's opinion of a particular topic, such as their perception or reported use of an eHealth system. Yet surveying as a scientific approach is often misconstrued. And while a survey seems easy to conduct, ensuring that it is of high quality is much more difficult to achieve. Often the terms "survey" and "questionnaire" are used ...

Crystallographic axes: a=1, b=1, c=1. Forms: [214], [104], [024], [100], [010] (Color coded in all example crystals). This morphology was used in all the crystal groups and classes for drawing the examples and the stereo images. The higher order forms were selected to best illustrate some of the subtle differences in the symmetry classes.

1.1 Overview of Anatomy and Physiology. Human anatomy is the scientific study of the body's structures. In the past, anatomy has primarily been studied via observing injuries, and later by the dissection of anatomical structures of cadavers, but in the past century, computer-assisted imaging techniques have allowed clinicians to look inside the living body.
