Security Engineering - A Guide to Building Dependable ...

About this chapter: Chapter 9 prescribes the minimum requirements for active fire protection equipment systems to perform the functions of detecting a fire, alerting the occupants or fire department of a fire emergency, mass notification, gas detection, controlling smoke and controlling or extinguishing the fire. Generally, the requirements are based on the occupancy, the height and the area ...

Chapter 9: Fire Protection and Life Safety Systems ...

Distributed vs. centralized. Distributed version control systems (DVCS) use a peer-to-peer approach to version control, as opposed to the client-server approach of centralized systems. Distributed revision control synchronizes repositories by transferring patches from peer to peer. There is no single central version of the codebase; instead, each user has a working copy and the full change ...
